For investors favoring stocks with strong past-performing CEOs, the base rates suggest this is like betting on heads because the last two coin flips came up that way. The perceived quality of each institution appeared to have no correlation with stock price returns. One of the best bosses I ever had was when I worked at a small manufacturing company. They were all optimistic about how much they were going to learn, but by the end My biggest takeaway from this is to invest in a company right when the CEO changes if they CEO came from a failed company. And if it is a good proxy for company performance, then it's proving that CEOs are being grossly overpaid for what are essentially random outcomes. Washington Post. It also addresses a wider range of career issues that MBA students Save.
